SUMMARY	<ul style="list-style-type: none">NLP researcher and engineer with over 6 years of experience, ranging from parsing, formal and distributional semantics, to information retrieval and natural language generationDemonstrated abilities in publishing award-winning papers in top conferences as well as developing NLP systemsTeam player and mindful independent learner
EDUCATION	<p>Ph.D. (Research Area: NLP) Aug 2019–Jan 2024 The Chinese University of Hong Kong (CUHK) Thesis: <i>Learning Semantics from Meaning Representations: From Distributional and Graph-Grammatical Perspectives</i></p> <ul style="list-style-type: none">ACL 2024 Area Chair Award (Track: Semantics): Awarded to one paper for each of the 21 tracks 2024 <p>B.Sc. (Hons) with First Class Honors in Computer Science Sept 2015–July 2019 The Chinese University of Hong Kong</p> <ul style="list-style-type: none">Dean's List: Awarded for academic excellence in the Faculty of Engineering 2016, 2017, 2018, 2019Master's List: Awarded to the top student of each major of each class in Wu Yee Sun College 2017, 2018, 2019ELITE Stream Student Scholarship: Awarded to recognize excellence in advanced-level courses 2017, 2019Computer Science Scholarship: Awarded to top students admitted to the computer science program 2016Admission Scholarship: Awarded to year-1 engineering students with excellent HKDSE results 2015
WORK EXPERIENCE	<p>Senior Algorithm Engineer (NLP/LLM) Mar 2024–Present TCL Corporate Research (Hong Kong) Co., Limited</p> <ul style="list-style-type: none">Develops chatbots featuring document retrieval, retrieval-augmented generation (RAG) with LLMs, and free-text summarization that work on bilingual (Chinese and English) domain-specific taxonomy and dataImplemented the data pipeline and developed a hybrid retrieval strategy that combines SQL, vector, and keyword-based queries with MySQL, Milvus, and Elasticsearch, thereby improving document retrieval performance over and replacing the team's previously developed methodDevised an algorithm that consolidates collections of unstructured free texts into tree-structured procedural summaries, resulting in more accurate and explainable outputs than pure-LLM approachesWorked on multimodal document understanding of unstructured PDF content using large vision-language models <p>Junior Research Assistant July 2019 Department of Systems Engineering and Engineering Management, CUHK</p> <ul style="list-style-type: none">Conducted collaborative research on cross-framework meaning representations (MRs) parsingDeveloped a transition-based text-to-MRs parser and published a paper in CoNLL 2019 Shared Task^[1] <p>Software Engineer Intern June 2018–Aug 2018 Set Sail Software</p> <ul style="list-style-type: none">Developed chatbots for multiple clients tailored to their needs using Node.js and Firebase Cloud FunctionsCreated tools for automating performance analyses of chatbots
NLP/ML PROJECTS	<p>Word to Function: Functional Distributional Semantics 2021–2023</p> <ul style="list-style-type: none">Studied Functional Distributional Semantics (FDS), a framework that combines formal semantics and distributional semantics and allows truth-conditional representations learning from corporaDeveloped a variational autoencoder from scratch using PyTorch sped up with distributed data parallelismOutperformed >20 models on the tasks of semantic composition and verb disambiguation, including BERT that uses 12× more data and 2× more parametersHypothesized, then confirmed that hypernymy (lexical entailment) can be learnt by FDS models, via connecting FDS with quantifications and the distributional inclusion hypothesisPublished papers at <i>*SEM 2023</i>^[4], and <i>ACL 2024</i>^[5] where I received the Area Chair AwardInvited to present at the 19th DELPH-IN Summit <p>Task-Oriented Dialogue System with Unstructured Knowledge Access 2021</p> <ul style="list-style-type: none">Collaboratively developed a dialogue system with the CUHK team that performs RAG of natural language response based on dialogue contextsLed a sub-team on ranked retrieval from an FAQ knowledge base, where we fine-tuned a BERT model that ranks the relevance of knowledge according to users' queries and dialog contexts using Huggingface and PyTorchParticipated in the Ninth Dialog System Technology Challenge (DSTC9) and our team ranked 12 out of 24^[2]

	Text Generation via Semantic Graph Parsing <div> <ul style="list-style-type: none"> • Demonstrated the use of a synchronous graph grammar in approximating the syntax–semantics interface of English • Developed a probabilistic graph parser from scratch that reconstructs syntactic derivations from semantic graphs, with devised adaptations that improve accuracy, efficiency, and coverage of graph parsing • Achieved better graph-to-text translation than a neural sequence-to-sequence method under out-of-domain settings • Published at <i>ACL 2022</i>^[3] and was invited to present at the Foundations of Language Processing of Umeå University </div>	2019–2021
	CV–JD Recommendation System <div> <ul style="list-style-type: none"> • Researched hypernymy detection and automatic taxonomy induction from corpus using distributional and pattern-based approaches • Wrote a web crawler to scrape over 40,000 publicly available CVs and 20,000 job descriptions (JDs) • Devised a CV–JD matching algorithm using doc2vec and Latent Dirichlet Allocation (LDA) </div>	2019
INVITED TALKS	<i>Functional Distributional Semantics (FDS) at Scale and Probing for Hypernymy in FDS</i> , 19th DELPH-IN Summit, Language and Information Society of University of A Coruña	27 June 2023
	<i>Semantic Composition with PSHRG for Derivation Tree Reconstruction from Graph-Based Meaning Representations</i> , Seminar at Foundations of Language Processing of Umeå University , Virtual	16 Sept 2022
ADDITIONAL EXPERIENCE	Teaching Assistant, Faculty of Engineering, CUHK <div> <ul style="list-style-type: none"> • CSCI2100: Data Structures • SEEM3550: Fundamentals in Information Systems </div>	2020–2023 2021–2023
	Resident Tutor, Wen Lin Tang, Chung Chi College, CUHK <div> <ul style="list-style-type: none"> • Provided pastoral care and any necessary support to undergraduate residents, including check-in/out, orientation to new residents, integration of international students, and conflict resolution • Served as an intermediary between the undergraduate residents, the warden, the Student Residents’ Association, the hostel staff, and the Student Hostels Committee of the College • Reviewed and assisted the Student Residents’ Association with the annual financial report </div>	2021–2023
CORE SKILLS	Natural Languages Cantonese (<i>native</i>), English (<i>proficient</i>), Mandarin (<i>proficient</i>) Programming Languages Python, C, SQL ML/DS Libraries PyTorch, Tensorflow, scikit-learn, Pandas, Numpy, Elasticsearch, Milvus NLP Libraries PyDelphin, Hugging Face, NLTK, Spacy, Gensim, WordNet, Others Git, Docker, Google Cloud
